

SAN DIEGO COMMUNITY COLLEGE DISTRICT

Board of Trustees Policy

BP 8100 - ENVIRONMENTAL SUSTAINABILITY

POLICY

Environmental sustainability is an essential goal of the District. Global warming, diminishing resources and escalating costs of energy and waste management require that management at all levels focus on the efficient and effective use of energy and resources. This policy expresses the Board's intent to implement a Districtwide Environmental Sustainability program within the constraints of current staff authorization.

The Chancellor shall develop implementing Procedures under the following rules:

1. Districtwide management responsibility for environmental sustainability shall be assigned to an existing District office.
2. Each campus/site shall assign local responsibility to a shared governance group.
3. An organizational structure shall be developed to ensure coordinated effort between the District Facilities Management Department and local shared governance groups.
4. Managers at all levels shall support the Districtwide Environmental Sustainability Management efforts.
5. Encourage use of renewable energy generation and purchase where practicable.

Adopted: February 18, 2010

Supersedes: Policy 8100, 4/3/08
