Coordinates 32°48'16.99"N 117°10'7.73"W

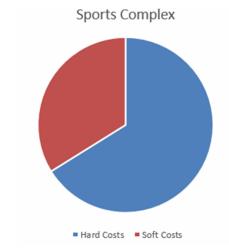

Project Features

The Mesa College Sports & Kinesiology Sciences Project will replace outdated and inefficient athletic, exercise science, and dance facilities with approximately 70,000 ASF of new construction and modernized infrastructure to meet current and future program needs. Anchored by a new three-court gym located between the upper and lower zones near the existing parking structure, the complex will include dance studios, athletic training areas, study spaces, locker and team rooms, equipment storage, and administrative offices. The project also features an expanded Aquatics Center supporting lifeguard and water safety training, replacing a 50-year-old pool, along with new beach volleyball courts, relocated softball and practice fields, and improved pedestrian connections across campus. Demolition includes the existing gym, shower/locker facility, and pool, totaling over 139,000 SF. Additional scope includes new site utilities, landscaping, accessible pathways and parking, curb and gutter improvements, and signage—all aligned with the college's Master Plan to improve equity, connectivity, and community access.
