Questions for Industry Panelists

1. What kinds of training, onboarding, or self-directed learning do you engage in to learn how to use AI in your industry or workplace?
2. In your industry, has using AI become an expected baseline skill, an advantage, or something else—and how does that expectation show up in daily work?
3. What does it mean to succeed as a professional in your field now that AI is more prevalent, and what skills or mindsets matter most alongside AI use?
4. Based on your experience, how can educators prepare curriculum and students prepare to use AI effectively and responsibly in the workplace—both technically and professionally?
