\*BUSN 623 Project Management III

Advisory:  
Successful completion of BUSN 621 Project Management I  
and BUSN 622 Project Management II, or equivalent.

Hours: 60

This course provides instruction in intermediate and advanced project concepts and tools that are not covered in the Project Management I and Project Management II courses. Topics include project cost management, project governance, project procurement management, project quality management, and project stakeholder management. Advanced concepts in the iterative project management tool Agile, project management leadership and communication competencies are also taught. The topics are interconnected via the project life cycle framework and the development and presentation of a project by the course students. (FT)

NEW PROGRAM – CERTIFICATE OF COMPLETION

Effective  
Summer 2021

**\*ADVANCED PROJECT MANAGEMENT**

**Approved**

Program Hours: 120

**Program Description:**

The Advanced Project Management Program, presented through three courses, provides students with an opportunity to learn the concepts, skills, and tools necessary to plan, implement and manage projects in any business environment. The subject of both the project and the management of the project are addressed by the program in both an introductory and intermediate perspective. The program courses include instruction in the fundamentals of project management, including planning, defining a project, resources, roles and responsibilities, necessary skills, tools and processes. The topics are interconnected via the Project Life Cycle framework and the development and presentation of capstone projects by student teams.

Instruction occurs in both the hard skillset, e.g., planning and costing, and the interpersonal skillset, e.g., problem solving and managing stakeholder involvement, found to be necessary tools for an effective project manager. Attention is given to the dynamic and changing environment in which projects are managed, e.g., Agile project management methodology in a rapidly changing requirements setting, and management of projects in a virtual setting.

Students who successfully complete the program can apply the skills learned to many diverse vocational occupations. This program can also be used as a foundation for additional educational training in any business area.

The following courses must be taken to complete the program.

- BUSN 621 Project Management I
- BUSN 622 Project Management II
- \*BUSN 623 Project Management III
