

## How do I record videos using my Webcam with Canvas Studio?

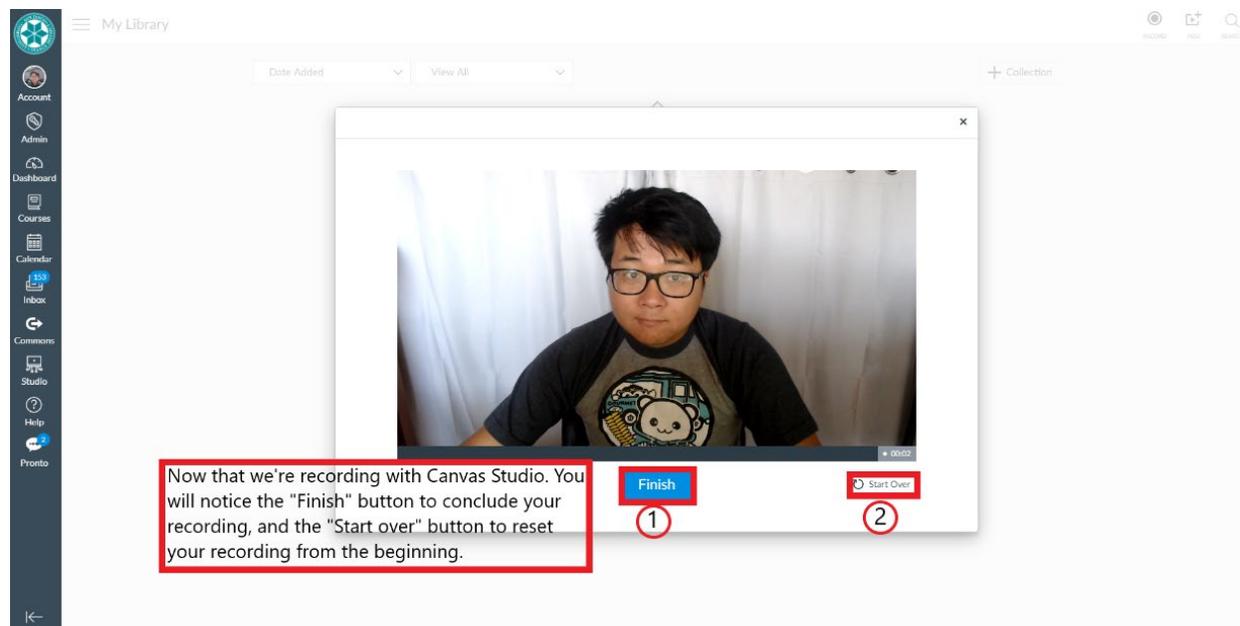

To record content in Canvas Studio you will need to select the recording button (1) and either select Screen Capture or Webcam Capture (2)

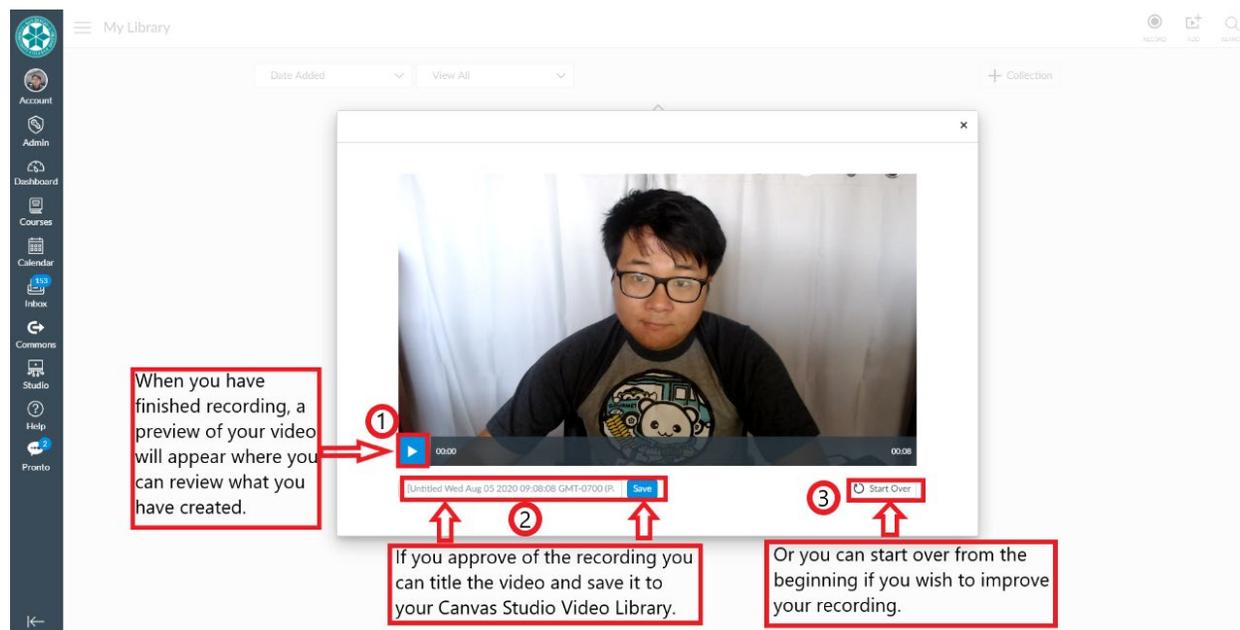

Once you have selected Webcam capture a preview of your video will appear and you can begin recording by selecting the corresponding button (1):

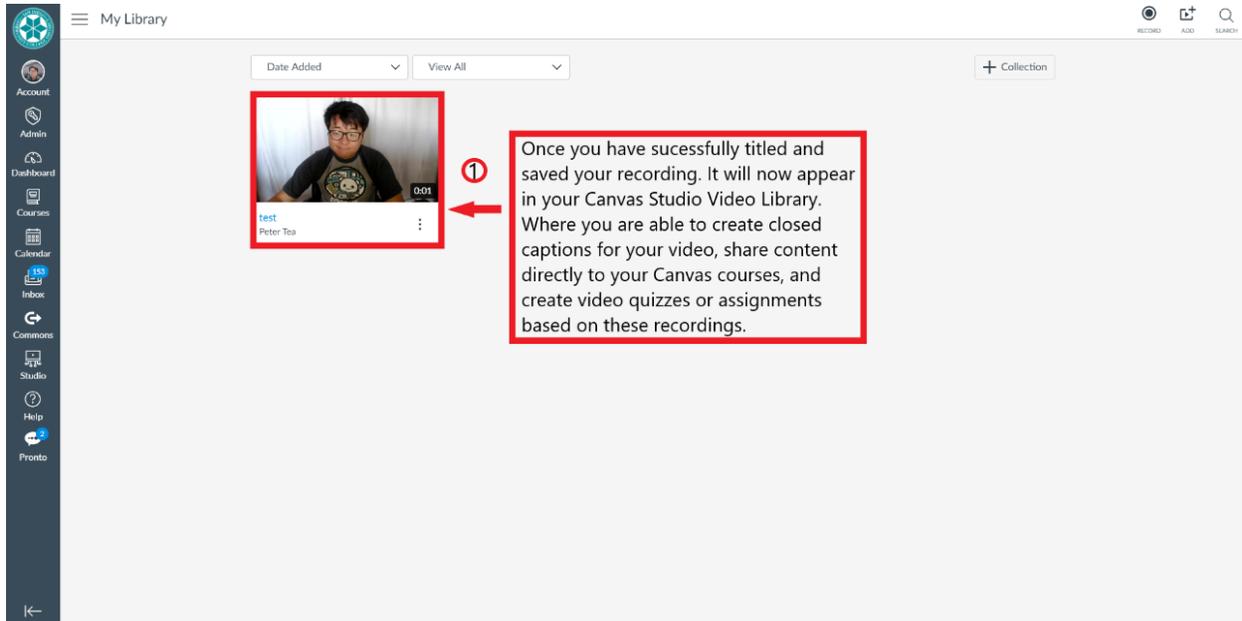

When you are satisfied with your recording you can select the finish button (1) or you can start over by selecting the “Start over” button to the right (2):

Now you will be able to review and watch your recording webcam capture (1) when you are satisfied with the content you are able to create a title for the recording and save it (2) or if you had found some issues and would like to start over. You can select the “Start over” button (3).

Now that you have titled and saved your video. You will now be able to access them on your Canvas Studio Library (1). Now you will be able to share the video content with you other courses or create video quizzes or enhance your discussions with video responses.

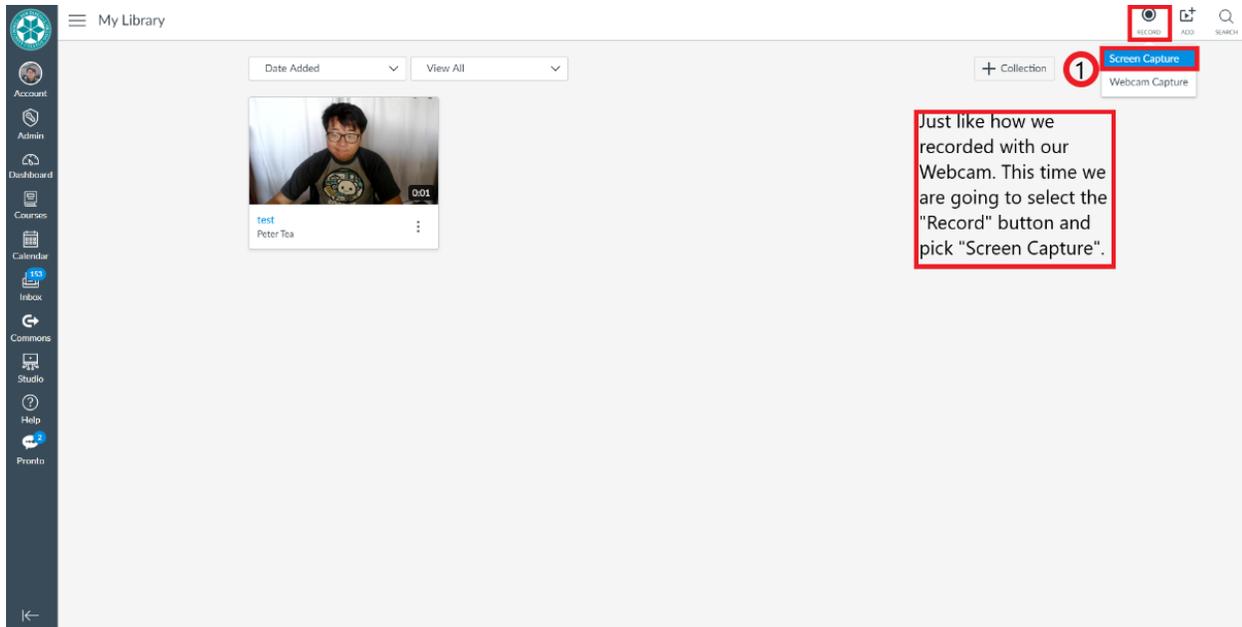

The screenshot displays the Canvas Studio Library interface. On the left is a dark sidebar with navigation icons for Account, Admin, Dashboard, Courses, Calendar, Inbox, Commons, Studio, Help, and Pronto. The main area is titled "My Library" and features a search bar with "RECORD", "ADD", and "SEARCH" buttons. Below the search bar are two dropdown menus: "Date Added" and "View All". A "+ Collection" button is also present. A video recording is shown in a red-bordered box, featuring a thumbnail of a person with glasses and a "test" title. Below the thumbnail, the name "Peter Tea" is visible, along with a "0:01" duration indicator and a vertical ellipsis menu icon. A red circle with the number "1" and an arrow points to the video thumbnail. To the right of the video, a red-bordered text box contains the following text:

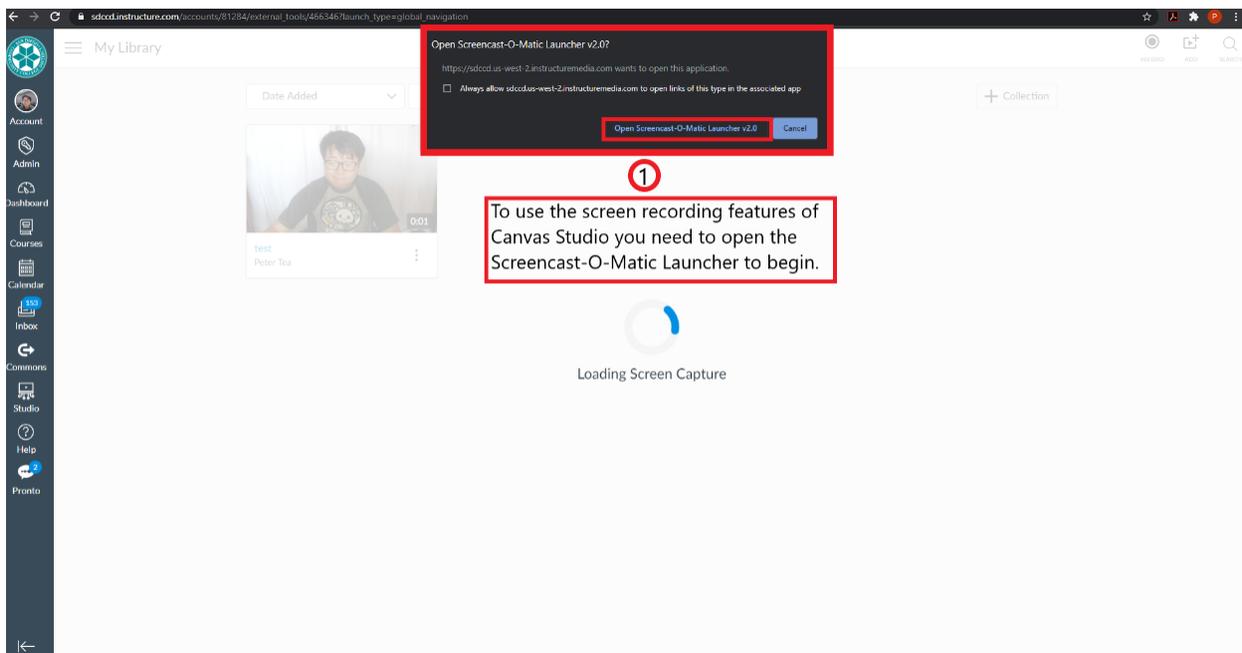

Once you have successfully titled and saved your recording. It will now appear in your Canvas Studio Video Library. Where you are able to create closed captions for your video, share content directly to your Canvas courses, and create video quizzes or assignments based on these recordings.

## How do I Screen Capture with Canvas Studio?

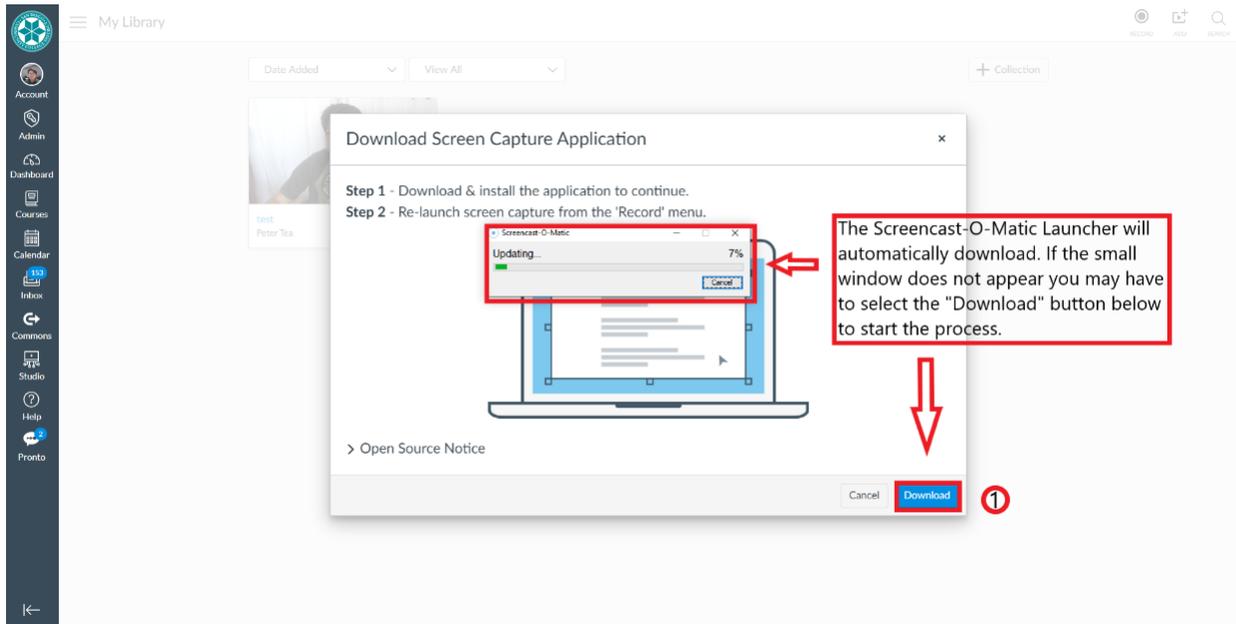

Now that we want to screen capture content we will access the record button on the right hand side and select the “screen record” option (1):

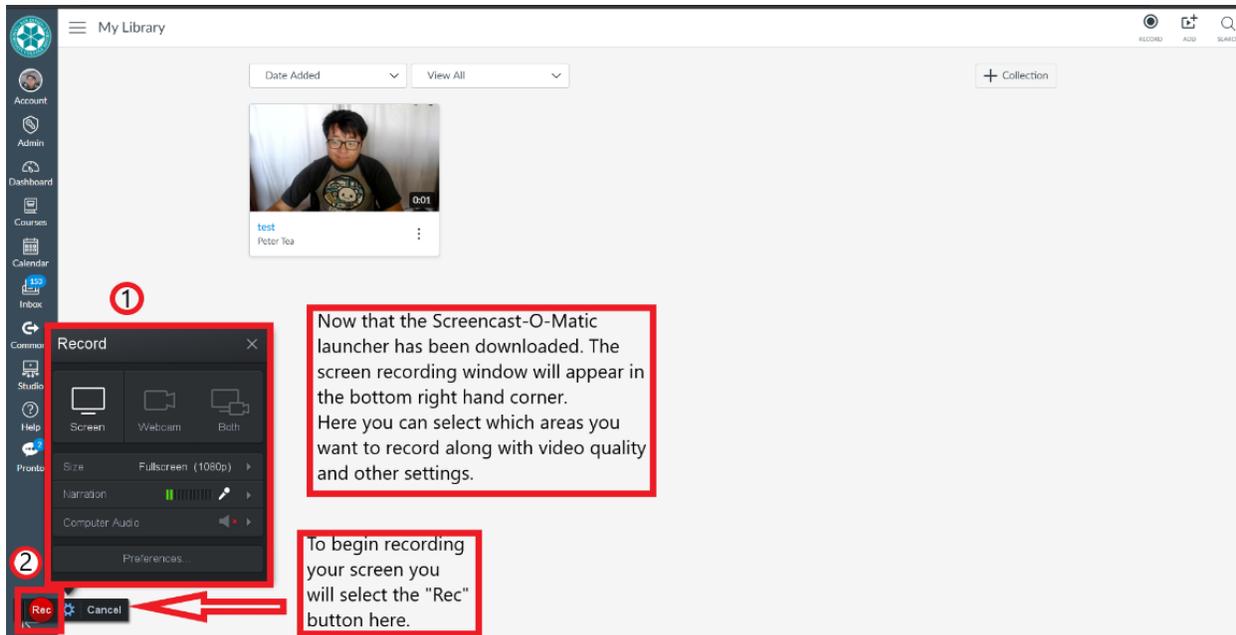

A popup will appear asking for permission to record your screen (1). You will select that you agree and will proceed to download the screen recording program:

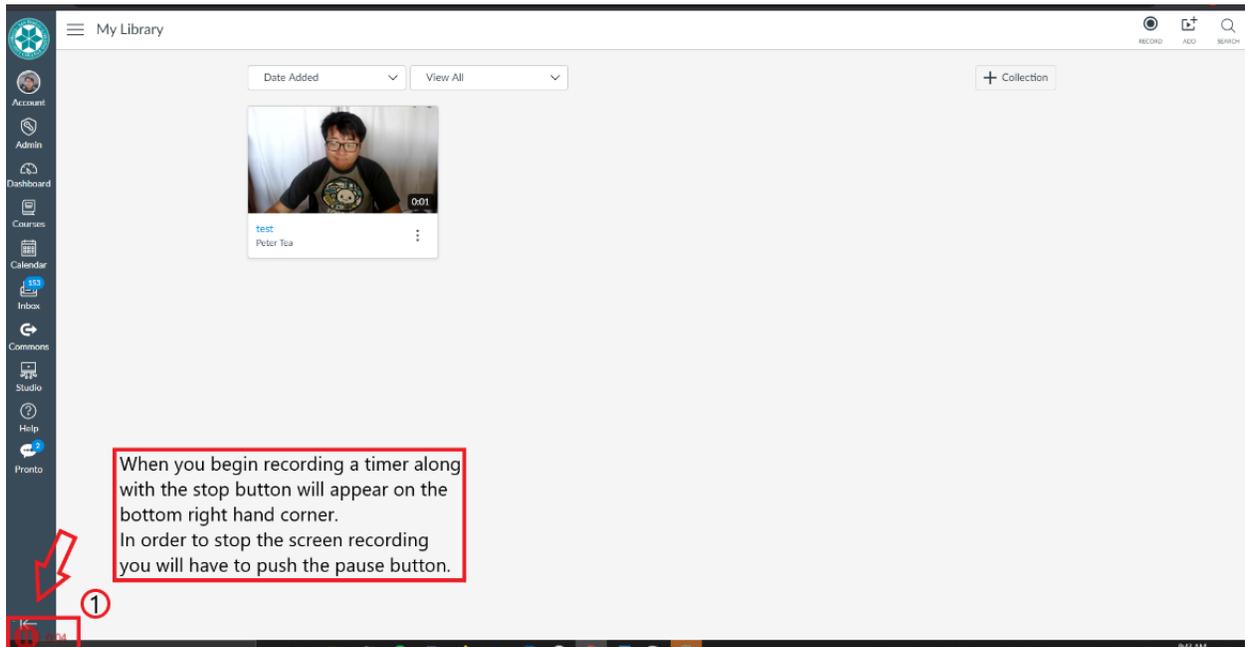

A new popup window will appear, and you will be able to download and install the screen recording software (1):

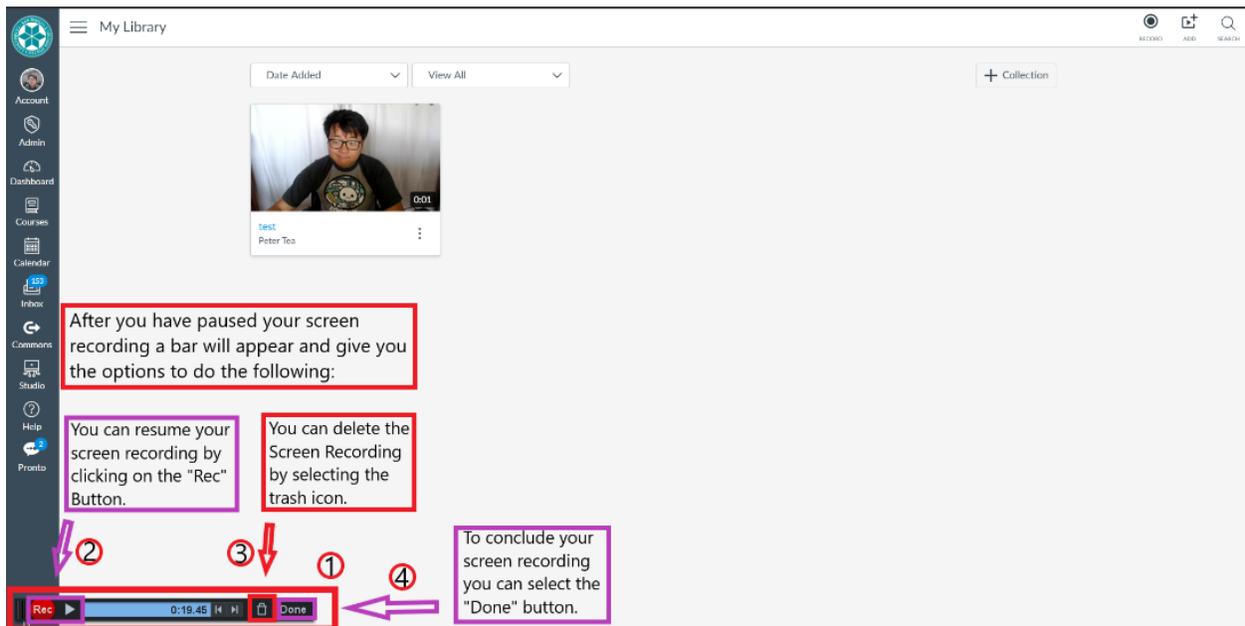

Once the screen recording software has been setup. You will be able to access the recording settings in the small window on the bottom left hand (1) and you will be able to start recording your screen and content by selecting the "REC" button (2):

When you start recording a timer and a pause button will appear on the bottom left hand corner (2). When you are finished recording you will pause and stop the recording:

Now that you have paused the recording a new bottom bar will appear (1). If you would like to continue recording you can select the “REC” button (2) or you can delete and start over by selecting the trash icon (3). When you are satisfied with your recording you can select the “Done” button (4) to move onward to the editing and revision process.

A new window will appear, and you will be able to give your video a title, description, and then upload your recorded Screen Capture in Canvas Studio (1).

Or you can select the edit option to cut and revise your video (2).

You are also able to review and re-watch your content (3):
