Certificate Programs/ Free Career Training

A Certificate Program is a series of classes that teaches a specialized job skill. San Diego Continuing Education provides more than 70 different certificates within our career technical education and career training programs.

One of the most valuable benefits of completing a Certificate Program is that when you're finished, you are more prepared to enter the workforce because you are already trained for a specific job.

Some programs allow students to earn college credit for successful completion of selected classes. A counselor can help you understand your options.
