SAN DIEGO
GATEWAY TO COLLEGE AND CAREER

San Diego Gateway to College and Career (SDG2CC) supports the community by building pathways for disconnected youth ages 18-24* to earn a high school diploma (HSD) or high school equivalency (HSE); connections to employment and internship opportunities; an apprenticeship readiness program, and transition to college.

Students who have previously withdrawn from high school due to life circumstances are encouraged to apply and complete an HSD or HSE in a college-based program while simultaneously earning college-level skills that lead to post-secondary certificates.

SDG2CC LEARNING COMMUNITY PARTICIPANTS

» Graduate from high school or pass the high school equivalency (HSE) or GED

» Earn a job training certificate that supports employment goals

» Prepare to start college, feeling ready and financially supported

» Explore career opportunities and achieve workplace skills in paid internships with local companies

» Become prepared for college and a career supported by services that help with job search, application, and interview

» Attend workshops and presentations

» Access direct support services
